1	MDIDGFDGF0001	CAMERA	1	Each	Camera : The Sony A7 III supports extended operation by drawing power through its USB-C port; when connected to a power bank or wall outlet, it can run while simultaneously charging the internal battery, eliminating the need for manual battery swaps during long-term monitoring. It also features a built-in Interval Shooting function. It can be programmed to automatically capture snapshots at set intervals ranging from 1 to 60 seconds, for a total of up to 9,999 shots per session. A start delay timer allows for hands-free initiation, making the camera capable of running unattended for hours or days—ideal for applications that require frequent, time-lapse snapshots over extended periods.
